

The CORE (kohr) Floor Standing & Wall Mount Line

The CORE products are refined, yet they provide an evolutionary blend of design, hardware and technology.

COREmaxx - Floor Standing Kiosk

The COREmaxx is a stately, attractive masterpiece that features a 24-inch widescreen HD Cinema Display. The format and resolution of the display are optimized for viewing high-resolution images and videos at maximum clarity. Companies commonly use the COREmaxx as a marketing tool by branding the front facade and utilizing the display for advertising. Interactive displays are an effective way to generate leads. The COREmaxx can also accommodate card readers.

Hidden in the heart of the COREmaxx is a small but powerful Mac mini or Mini-ITX PC that allows the kiosk to maintain its optional sleek and slender presence. Choices include five types of metals, five kinds of real woods and five colors of acrylic. Company logos can be laser-etched in acrylic and backlit in one of four colors of LEDs. The brilliance of the optional glowing LEDs and attractive display complement the attention-grabbing selection of front facades.

COREμ (kohr my-cro) – Wall Mount Kiosk

Phoenix Kiosk also offers the COREmicro, a smaller, wall-mountable version of the COREmaxx. The COREmicro has all of the capabilities of the COREmaxx – just like the COREmurl, which is a wall-mountable, full-size COREmaxx without the base.

COREmurl – Wall Mount Kiosk

The COREmurl makes the typical wall-mount unit seem a bit understated. This attention grabber is the COREmaxx without the base and features a 24-inch widescreen HD Cinema Display. Companies commonly use the COREmurl as a marketing tool by branding the front facade and utilizing the display for advertising.

Many clients use the CORE Kiosk Line for the following:

- Branding/Advertising
- Sponsored Messaging
- Surveys & Lead Generation
- Card Reading/Scanning
- Recording/Photos
- Web-Based Applications
