

Scan-to-Win Kiosk Solution

Increase Your Leads by Instantly Gratifying Your Prospect

Phoenix Kiosk's Scan-to-Win Kiosk Solution allows a company to administer its own prize-giveaway program. This can include raffles or similar contests. Participants simply place their ticket under a barcode scanner to determine if they are a winner. Many companies utilize contests as an exciting and effective way to attract attention and advertise, as well as to generate leads and additional sales revenue. The Scan-to-Win solution comes complete with an administration component that allows a company to run a limitless number of different contests.

The Scan-to-Win Solution is delivered with a 2D barcode scanner and either a touch screen or a keyboard/trackball combination that allow the user to perform necessary tasks. An easy-to-use reporting component can allow both the user and administrator to see how many times a particular prize was won, etc. Reports can be exported to a .CSV file before the kiosk database is cleared for the next event.

Companies that implement the Scan-to-Win Solution must provide only a few essential components, including screensaver graphics and text, prize graphics and text, and 2D barcode samples and numbers. Additional text may be provided for add-on screens, such as a “Congratulations” screen or instructional screen, at the company’s discretion. The Scan-to-Win Solution is designed for a stand-alone kiosk that does not connect to the Internet or a private network.

The Scan-to-Win Solution and Associated Programs Can Be Successfully Implemented in a Number of Environments:

- Conventions
- Tradeshows
- Annual Meetings
- Company Events
- Public/Special Events
- Retail Spaces/Car Dealerships
