SolarSentinel

Solar Energy Monitoring For Your Eco-Friendly Organization

The SolarSentinel is a solution engineered to provide complete metrics on energy usage through an innovative software interface paired to one of our attractive kiosk designs.

- The SolarSentinel is an excellent way to educate students, customers and employees about the positive environmental impact resulting from your organization's solar energy utilization.
- SolarSentinel can be showcased in school buildings, corporate lobbies or other high traffic areas.
- The product demonstrates clean energy production and positive environmental impact from your organization's solar PV power system. Organizations can display real time data showing the benefits of their efficient power utilization in an attractive, compelling and informative presentation.

The SolarSentinel system with PowerLobby software, cleverly displays EcoFriendly Data to provide the viewer a clear perspective to the benefits of Solar Energy Collection

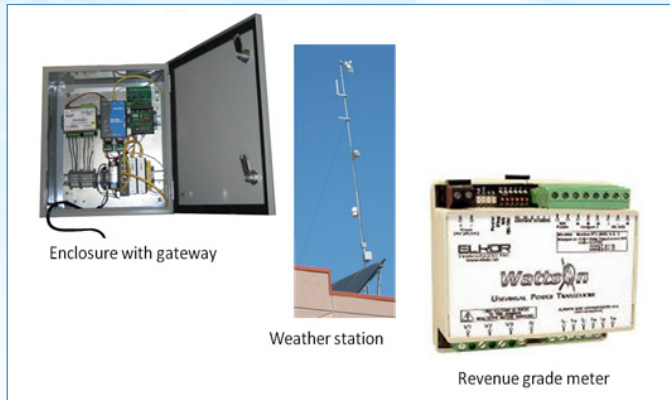

Real Time Data of Your Energy Utilization
