

V2 (vee-too) Floor Standing Kiosk Line

The V2 is where self-service meets self-indulgence.

The V2 is the next generation in kiosk innovation. The smooth curves are inviting to the user, and the modern front-access design minimizes floor space requirements. Hidden wheel glides provide the V2 with quick and simple maintenance access in any location. The entire unit can slide forward from its base so that peripherals such as printers can be serviced without moving the entire unit away from a wall or other area.

The low price of the V2 allows everyone to benefit from high-end kiosk technology without having to compromise quality or functionality. Compared to other models, the V2 supports a wide range of peripherals due to its deep body and specially shaped interior. The V2 is capable of holding large peripherals such as color printers and cash recyclers.

The V2 is the perfect kiosk for lobby/reception applications, in-store cataloguing applications, and transactional applications. The V2 also provides a powerful stage for a myriad of branding options. It is also available with a dual display that enhances functionality and provides an excellent opportunity for advertising or other messaging.

Many clients use the Sliivr Kiosk Line for the following:

- Bill Payment & Ticketing
- Printed Security/Identification Cards
- eConcierge
- Check-In/Check-Out
- Human Resources
- In-Store Cataloguing/Product Showcases
- Business Directory/Wayfinding
- Surveys & Lead Generation
- Web-Based Applications
