

Viion (vye-on) Floor Standing Kiosk Line

The Viion is the ultimate in versatility and functionality.

There's a lot to like about the Viion, one of PK's most popular and versatile models. The Viion stands out because of its contemporary look and its sleek, symmetrical form. Quality and functionality are never compromised with the Viion, which allows for a wide range of options including printing, cash and coin handling, overhead marquis monitors and light boxes, monitor size upgrades, additional access options, and more.

Viion is well-suited for high-use transactional applications, and it can also print security and identification cards. It is a natural choice for eConcierge and check-in/check-out services. Nearly every industry has found a common use for the Viion because its many capabilities range from human resources, to wayfinding, to marketing and lead generation.

The Viion is also available with a dual display that enhances functionality and provides an excellent opportunity for advertising or other messaging. Or, if users will be at the kiosk for more than a few minutes, the Viion sit-down model makes perfect sense. And lastly, the Viion is available with front access so that peripherals such as printers can be serviced from the front, which eliminates the need to move the kiosk away from a wall.

Many clients use the Viion Kiosk Line for the following:

- Bill Payment & Ticketing
- Printed Security/Identification Cards
- eConcierge
- Check-In/Check-Out
- Human Resources
- In-Store Cataloguing/Product Showcases
- Business Directory/Wayfinding
- Surveys & Lead Generation
- Recording/Photos
- Web-Based Applications
